INDICATIONS FOR USE: The truSculpt RF energy is intended to provide topical heating for the purpose of elevating tissue temperature for the treatment of selected medical conditions, such as relief of pain and muscle spasms and increase in local circulation. Additionally, the 2 MHz setting for the 40 cm2 handpiece is indicated for reduction in circumference of the abdomen and non-invasive lipolysis (breakdown of fat) of the abdomen. The truSculpt massage device is intended to provide a temporary reduction in the appearance of cellulite. **IMPORTANT SAFETY INFORMATION:** Expected Transient Events and Possible Adverse Effects: bleeding, bruising, blistering, burns, crusting, discomfort and pain, increased vascularization of the treatment area, infection, lumps, numbness, redness (erythema), scabs, scarring, skin color changes, swelling (edema), tenderness. **CONTRAINDICATIONS:** Infection in the target area, history of poor wound healing; history of keloid formation; pregnancy; cardiac pacemakers or internal defibrillators; malignant or benign tumors in the target area; multiple sclerosis; arteriosclerosis or weakened blood vessels; history of hemophilia or bleeding disorders; thrombosis or thrombophlebitis, either acute or sub-acute In addition, the device should not be used to treat over the following areas: over implanted devices, including metallic implants, electronic implants, time-released medical implants, and superficially placed body contouring implants, on the head – near or over the eyes – near or over the ears – transcerebrally, on the neck – over the carotid sinus – over the trachea or thyroid cartilage , near or over the heart, near or over reproductive organs, directly over the spinal column, over healing fractures or bone growth areas, places where the skin suffers from any sensory impairment, over the ischemic tissues in individuals with vascular disease where the blood supply would be unable to follow the increase in metabolic demand. **WARNINGS:** Bleeding, bruising, blistering, burns, crusting, discomfort and pain, increased vascularization of the treatment area, infection, lumps, numbness, redness (erythema), scabs, scarring, skin color changes, swelling (edema), tenderness.

truSculpt®

truSculpt®

A QUICKER WAY TO A SMALLER WAISTLINE[1]

Get ready to redefine your fat loss routine with one of the fastest body sculpting treatment on the market.[2] truSculpt allows you to personalize your ideal body, targeting the waistline typically resistant to diet and exercise.[1] It's the edge you need for the look you desire.

Average
24%[3]
fat reduction per treatment area

WHY TRUSCULPT?

- Non-invasive and comfortable, with little to no pain and zero downtime[1,3]
- 15-minute treatment sessions[1]
- Isolate and target the areas you want to improve[1]
- Treat multiple areas simultaneously[1]
- Safe on all skin and most body types[1]

TRUSCULPT

HOW IT WORKS

truSculpt uses non-invasive monopolar radiofrequency technology to ***selectively and safely target fat cells*** for the slimmer shape you're seeking.[1]

Eliminate unwanted fat around the waistline[1]

1 truSculpt delivers gentle heat to damage targeted fat cells[1,4]

2 Real-time temperature control ensures a comfortable treatment experience for you[1]

3 After a 15-minute treatment, the damaged fat cells are eliminated from the body naturally over a period of 12 weeks [1,4]

FAQs

Am I a candidate for truSculpt?

truSculpt will improve the shape, definition and contouring of the abdomen and flanks on all skin and most body types, so almost anyone can benefit from a treatment.[1,3] Please refer to the Important Safety Information for full list of contraindications and warnings. During your consultation, your provider will discuss with you if you are a candidate based on goals, health and medical history.

How many treatments are needed?

Studies show an average reduction of 24% in the treated fat in just one treatment.[3] Additional treatments may be required to achieve the personalized results you desire.

What will treatment feel like?

truSculpt treatments are typically described as hot but tolerable.[6] The heat may be adjusted for your comfort.[1] Results are even and consistent.[1,3]

Is there really no downtime?

truSculpt treatments are non-invasive, require no recovery time, and allow you to immediately return to normal activities after treatment.[1,3] After treatment, the treated area may be warm and flushed for a few hours.[1]

When will I see results?

Optimal results are seen after 12 weeks.[3,5] To achieve your personal goals, additional treatments may be required.
